Foiled Again.

Traffic at the busy corner seemed to be tied up in a hopeless knot. Three hundred impatient motor horns blended with the tweet tweet of the cop's whistle, and confusion was worse confounded. At length the big sergeant arrived to untangle the mess. As the stream began to flow again he asked the officer on duty: "What in Sam Hill caused all this anyway?"

"One of them women drivers, Sarge. She signalled as if she wanted to turn to the right and then danged if she didn't turn that way."

Heard on College Heights.

Here and There

An orchard consisting of only one tree which has borne 116 different varieties of apples and one variety of pears by means of careful grafting, is located in Eastern Canada. This season 47 varieties of apples put forth blossoms.

Canada produced 1,285,888 ounces of silver during March as compared with 1,397,154 ounces in February and 1,460,137 ounces in March 1932. 2,976,818 ounces were produced during the first quarter of 1933, a 17 per cent. decline as compared with the same period in 1932.

Hon. Frank L. Folk, acting secretary of state for the United States in 1918-19, well-known corporation lawyer and director of many companies including the Chase National Bank and the Northern Pacific Railway, is staying at the Banff Springs Hotel with his family for the summer vacation.

More than equalling expectations the New York-Montreal cruise of the Duchess of Bedford, set a new holiday record for special trips recently when 900 passengers took the excursion. Guaranteed a romantic moon every night and a picturesque run down the St. Lawrence, the passengers embarked steadily at the rate of three to the minute for five hours.

Wheat-cutting is now general in Manitoba and under way in the other prairie provinces, according to a recent weekly report issued by J. M. McKay, general agricultural agent, Canadian Pacific Railway, Western Lines. There is still, however, great need for further moisture, especially in the central and southerly parts of the grain-growing provinces.

Fresh from a victory in which he carried an appeal for a Chinese sentenced to hang, to the Privy Council, ending in commutation to life imprisonment, Rev. Father Joseph S. Donovan, of Maryknoll, N. Y., landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

Seeking the big fish he missed catching when he was unable to accompany their Majesties the King and Queen of Spain to Campbell River in September 1931 during their Canadian-American tour, Brig-General E. de B. Paquet, chief of the Canadian Pacific Investigation Department, is on a trip to the waters of the fighting trout, one of the prize game fish of British Columbia lakes and streams.

Cultural and educational relations in the Pacific will be stressed at the fifth Biennial Conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 14-28, though economic problems will naturally be to the fore in the discussions, stated Miss Elizabeth Green, editor of the Institute's Journal, on her arrival aboard the Empress of Canada at Vancouver recently en route for Banff.

Change in Train Service.

A change took place this week in the local train service, west-bound passenger trains going thru on Sunday, Tues. and Friday at 10.35 p.m.

The east-bound passenger goes thru Stony Plain Thurs. Sat., at 4.51 a.m.

The train leaves Jasper at 8 p.m. Mon., Wed., Sat., arriving at Ft. Rupert at 8 p.m. Tues., Thurs., Sunday.

Poor Drivers'll Have No Alibi

It will be of interest to motorists who visit the City to know that the Alberta Motor Ass'n has commenced the distribution to motorists, free of charge, a booklet outlining Edmonton's bylaws governing traffic, so that there will be no excuse on the part of the driving public to plead ignorance of the law. These booklets may be had by calling at the office of A.M.A., McLeod Building.

Youngster Killed by Binder

A sad accident occurred in the Carvel District on Thursday last, when Mike, the 4-year-old son of Mr. and Mrs. Harry Shaigeo, was instantly killed when struck by a binder which his father was operating. The youth had been playing in the grain with his brothers, sisters and mother, who had brought out afternoon lunch to the harvest workers. Getting tired the youngster lay down and fell asleep. Cutting operations were resumed without anyone's noting where young Mike was located. The noise made by the binder did not waken the boy, who, as the reaper mowed row after row, finally lay directly in its path. The body was so badly ent and mutilated that death is thought to have been instantaneous; and it was decided no inquest was necessary.

He leaves to mourn his loss his parents, three brothers and three sisters.

A funeral service was held on Friday morning at the Greek Catholic Church in Carvel, with Rev. Father Popowich officiating. Interment was made in the Carvel cemetery.

Mr. John Armbruste had charge of the funeral arrangements.

Church Services.

Service at Rosenthal Lutheran church, next Sunday, is at 10.45 a.m.

German Lutheran services will be held in Stony Plain next Sunday at 2.30 p.m.

United Service at Holborn Hall next Sunday at 3 p.m.

United Church service every Sunday Evg. at 7.30.

On Sunday, Sept. 3d, Rev. J. R. Rolheiser of St. Joseph's Cathedral, Edmonton, will open "The Devotion of the Forty Hours" at 11 a.m., at St. Philip's church, in Stony Plain. Sermons will be given in the German language and in the English language.

Services will be continued on Sunday evening at eight o'clock; also on Monday Evg. and on Tuesday Evg. at the same hour. Rev. C. Keenan, pastor.

On Sunday Sept. 17 there will be Lutheran service at St. Matthew Schoolhouse at 7.30 p.m., by Rev. H. Kuring.

SERVICE GARAGE, Stony Plain

Canada As a Leader.

Judged in terms of years, Canada is a very young country, and this fact is brought home to any one who studies the histories of the countries of Europe and Asia. Canada, too, while a country great in area, is of sparse population and in this respect is nowise comparable to the older countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canadian achievement. On August 5, 1933, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean, "any ocean in fact," steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1831, and with Canadian built machinery except the cranks and shaft, which made this epoch voyage, sailing from Pictou, Nova Scotia, on August 6, 1833, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up all the way." According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established two primary records, "two Canadian records, three foreign records, and two world records."

The "Royal William" was: (1) The first seagoing steamer ever built in Canada; (2) the first steamer that ever plied on intercontinental affairs, from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack; (4) the first steam transport in Portugal; (5) the first steam man-of-war in Spain; (6) the first vessel in the world that ever fired a shot in action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way.

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a special commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of the "Royal William" also serves to remind one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians can recall with pride that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marquis wheat, the effect of which has been to greatly extend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garnet and Reward.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave insulin to the world, that wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such diseases.

Nor is it a small matter that through the efforts of a few millions of people they have made their country, Canada, the fifth trading nation in a world of trading nations, surpassed only by older, more populous and wealthier nations.

There are many other fields in which Canada, during its brief history, has led the world, but neither time nor space will permit of extending this recital; sufficient has been recorded here to establish the truth that Canadians have reason to entertain great pride in their country and in its achievements. May more, that there is every reason why the people of Canada should have unbounded confidence in the future of their country. All nations throughout the world's history have suffered temporary reverses and setbacks; all have passed through periods of depression and hardship. But where the hearts of the people have been true, where they have not been given over to indolence and sloth, where they have maintained their virility and strength, where they have been courageous and determined, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides an incentive and encouragement to the Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized if our people seize the occasion when "Opportunity" does knock.

Church thieves are busy in Scotland.

Glasgow, Scotland, will establish a dog patrol police force.

Norwegian fishermen caught 49,548,000 codfish this year.

All foreign workers have been prohibited entry into Spain.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharge checked before they become serious.

To check these unusual discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 33 years. It is rapid, reliable and effective in its action. A few doses are generally all that is required to give relief. Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals
Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Sangerhausen rosarium, is drawing throngs of visitors to this small Harz town.

The unique flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses—"Chateau de Clos Vougeot" and "Lord Castlereagh." It is of a velvety deep black-red hue, so dark—especially in dry, hot weather—that it may be described as black. The fragrant petals show no shading whatever.

Some 400,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 80-year-old Professor Ewald Gnau, supervisor of the gardens, who is affectionately known as the "rosen-vater" (father of the roses).

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose that 32 lb. of fat?" is what you will be asking. Let her tell you herself:—

"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially new frocks. Nothing would fit me comfortably, and walking was unbearable. I was advised by a friend to try Kruschen Salts, and I am very glad I did, too. During the first ten months I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs., and I feel much better in health. I have all my weight tickets to substantiate my statements."—(Mrs. M. P. Kruschen)

Kruschen contains those six mineral salts, proportionately balanced, found in the waters of those famous European Spas used by generations of fat people to reduce weight.

Kruschen helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel years younger—look better, work better.

Poison Antidote

Discover Effective Medium To Offset / Effects Of Carbon Monoxide Poisoning

Discovery of a sulphur-sodium antidote more effective against carbon monoxide poisoning than anything previously known is claimed in a report published in New York by John H. Draize of the University of Wyoming.

The antidote likewise surpasses anything else in effectiveness against cyanide poisoning, he says. He credits the cyanide discovery to B. Foresti, an Italian scientist.

The antidote is sodium tetrathionate, a well known synthetic chemical. Its constituents are sulphur and sodium. Draize used it by intravenous injection on poisoned rabbits.

Has Massive Program

Russia Planned Big Increase In Production This Year

With the launching of the second Five-Year Plan, Russia has outlined a programme of massive production for this year. For 1933 big increases are planned in agriculture, electricity, coal, oil, iron and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 about 64,000,000 tons of coal were produced, 84,000,000 are budgeted for this year, and the output of 6,000,000 tons of steel in 1932 is to be increased to nearly 9,000,000 tons. It is also planned to raise the number of cattle from less than 8,000,000 in 1932 to 9,000,000, and that of pigs from 4,000,000 to 5,000,000.

Land For Ships

Considerable backing has been given Australia to the proposal recently made by Dr. Duhig, the Roman Catholic Archbishop of Brisbane, that the mandated territory of New Guinea be handed back to Germany on condition that Germany contribute adequate ships for Australia's defence. Mandates for the former German possessions in the Pacific were divided among Australia, Japan and New Zealand.

Back taxes are being paid in wood in Carinthia, Austria.

Experiments In Taxation

Record Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history. Henry the Eighth taxed beards, and graduated the tax according to the position of the wearer. The Sheriff of Canterbury was constrained to pay the sum of three shillings and fourpence for the privilege of wearing whiskers. Elizabeth likewise put a similar tax on every beard over a fortnight's growth. Elizabeth was also bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine. In 1695 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, whilst the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the privilege of single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hair. Then there was a tax on hair powder and a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided, for the purpose of taxation, into common and dressed bricks, and the duty on each kind of brick was regulated according to its size.

Paid For Grumbling

Man In England Earns Good Living Finding Faults

A London clerk is earning a living by going round the city finding fault with everything. One day he went into a big tea shop and found that the shape of the teacups they used was clumsy. It was impossible to drink out of them without spilling the tea. So he wrote the company about it and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without presenting a ticket. Upon another occasion he saw that a big sign in the West End of London was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed. His job arose from a life-long habit. If ever he saw anything was wrong he used to write to the owner about it. He merely used it as a matter of principle, but when he was out of a job he suggested that if his criticisms were of any use he should be paid for them. Now he makes a handsome income from being a grumbler!

Good Crop Of Hay

Thousand Tons Out At The Pas During Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a radius of 10 miles of The Pas, according to estimates made there.

Several outfalls have been operating in the area. Hay is good this year. High water did not affect it. It is of better quality than for many years past, haymen say.

St. Gobard cut 400 tons, Transport Limited 200, and others including Frechette, Allard, as well as settlers of the Carrot River Valley, smaller lots.

The Indians of The Pas reserve have also garnered enough for winter fodder.

LUNCHEON TOMATOES

Two cups cooked tomatoes; ½ cup sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; ¼ teaspoon pepper. Grated American Cheese. Heat tomatoes to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover tightly two minutes. Pour into serving dish, sprinkle generously with grated cheese. Serve at once. Serves six.

Radium contains a tremendous store of energy. Although it gradually breaks up, only half of a given quantity will disappear in 1,800 years.

Cyclists of New Zealand are to be compelled to observe traffic rules.

One Good Roll

Deserves Another

This is what men say when they make the acquaintance of Ogden's fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover—then light up, and learn the rest of the good news. Sweeter, more fragrant, mellow—all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chantrel cigarette papers with it and you will get a still better smoke.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Tea Is Old Before

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China it was not until nearly four hundred years later that Europe began to hear of tea through the Portuguese and the Dutch. The first Englishman to mention tea was a Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 15s. to 50s. a lb. in the leaf. It was also sold in liquid form, made, so the vendor said, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

This Clock Is Different

A bronze lion, twelve feet high, which will roar at noon, and a cock, six feet high, which will crow at sunrise and sunset, are features of a huge new clock erected in Messina, Sicily.

First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam all the way. The historic voyage was made by a Canadian-built wooden paddle-steamer, the "Royal William." To commemorate this notable event the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April, 1831, and towed to Montreal to be fitted with engines developing 200 horse-power. Her cost when ready for sea was \$75,000. Her dimensions were: length over all 176 feet; depth of hold 35 feet; breadth over paddleboxes, 44 feet. She was originally intended to ply between Montreal and Quebec and Nova Scotia, and the enterprise of building her was carried out by a group of Quebec and Halifax merchants, assisted by a grant of \$15,000 from the Government of Lower Canada. Among the shareholders appear the names of three Cunard brothers, one of whom later founded the present Cunard Line.

After three moderately successful voyages in 1831 to Halifax and intermediate ports she sailed for the winter. In 1832, owing to a cholera epidemic, she made only one voyage, and her owners became bankrupt.

In the spring of 1833 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then in June, 1833, she sailed on a trip to Boston, where she was enthusiastically received as being the first steamship flying the Union Jack to enter a United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, by being the first to world the feasibility of navigating the oceans by means of steam-propelled vessels, notwithstanding the declaration of critics that "they might as well talk of making a voyage from Quebec to the moon."

Early in August, 1833, she left Quebec for Pictou, in the Northumberland Strait, where she remained a few days coaling, storing, repairing engines, and awaiting passengers. Eventually, on August 17th, she steamed out of Pictou Harbour for England. Her clearance papers stated she was a vessel of 363 tons bound for London; that among the goods carried were 254 chaldrons of coal (648 tons), a consignment of ship's spars, a box of stuffed birds, one harp, one box, one trunk, household furniture and seven passengers, all British. Her master was John McDougall. During the voyage the star-board engine was disabled and the vessel sprang a leak. After 25 eventful days and nights the "Royal William" arrived at Gravesend. Ten days later the vessel was sold for \$50,000 and chartered to the Portuguese Government as a troopship. Captain McDougall retained command and took her to Lisbon, where she was successfully offered for sale to the Portuguese.

In 1834 the ship was bought by the Spaniards, sent to Gravesend to be converted into a "war-steamer," and was renamed the "Yanbel Segunda." Later she returned to the Spanish coast, and on May 5, 1838, in the Bay of San Sebastian, she earned the distinction of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repairs but was converted into a hulk. Her engines were transferred to a new ship of the same name, which ultimately sank off the Algerian coast during a violent storm in 1860.

And so, with her hull rotting in Bordeaux harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

France is testing out a new type of vessel post-warship.

Lives High Above World

Home Of Forest Reserve Guardian
8,130 Feet Above Sea Level
Perched on a narrow patch of crumbled rock, 8,130 feet above sea level, where he lives all summer as one of the provincial government's Bow River forest reserve guardians, Arthur Shantz told a reporter that "it'd be all right if I could keep the place warm and the government would give me enough paint to cover the cabin."

Those were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 30 feet wide by 50 feet long.

The lumber for the shack occupied by Shantz, who likes to call himself the "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

By Ruth Rogers

MODISH AND SLENDERIZING LINES HAS THIS LOVELY DAYTIME DRESS

Here's a charming model for the heavier figure. The partial belt treatment creates a lengthened line. The skirt while slender, indicates an easy flare at the hemline. It is simple, smart and becoming in brown and white crinkly crepe silk against a bit-like yoke of white crepe. It's a dress that will carry you through an entire day.

It will cost you but a small sum to make it, and will take very little of your time.

Plain grey, beige or black with white is delightfully lovely.

Style No. 643 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3/4 yards of 39-inch material with 1/4 yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's Fruit Crop

Apples Will Be Plentiful But Other Fruits Scarce

The Dominion Department of Agriculture estimates the 1933 crops of peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,438,000 barrels on the Canadian apple crop, compared with 3,977,000 barrels last year.

Canada's pear crop this year was estimated at 434,000 bushels, compared with 469,000 bushels last year. The peach crop was placed at 815,000 bushels, a drop of 91,000 bushels from 1932. The plum crop was estimated at 22,000 bushels, only 79 per cent. of last year's total. Due to failure in Ontario, the commercial grape crop was estimated at 44,568,000 pounds, compared with 54,100,000 pounds last year.

Trade Within Empire

Canada's Trade Shows Increasing Exports To Empire Countries
All British Empire countries, but the British West Indies, imported more goods from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada rose from \$2,068,262 to \$3,183,654, or 53.9 per cent., while those of the United Kingdom increased 34.8 per cent., from \$49,907,811 to \$63,222,280. Imports of Canadian goods into British India rose 25.9 per cent. to \$989,146 and to South Africa 16.6 per cent. to \$1,528,182. New Zealand imports were up by 9.2 per cent. to \$1,005,533 and those of Newfoundland 1.1 per cent. to \$1,823,864.

Russians Cannot Own Dogs

Must Be Killed For Skins To Clothe Soviet Army

In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to special dog pounds. The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the army's requirements.

Ides Did Not Work

Following complaints of smaller merchants that department stores in Tokyo were injuring their business, the big stores in Tokyo were ordered to close three days every month. Now the smaller merchants report that on those days shoppers stay at home and the sales of stores remaining open have decreased.

Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

Unridden To The Last

Bucking Horse Retires From Rodeos Still Unconquered

"Midnight," eldest of western stamper horses, has made his last appearance before a rodeo audience, taking the final curtain call in a cloud of dust at the Cheyenne round-up the other day. He will be retired to the green pastures.

"Midnight," perhaps the greatest bucking horse ever known to the rodeo world, plunged out of the Cheyenne arena chute and, reaching for the sky with his front feet, head down and hind feet poised ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1933 Cheyenne round-up champion rider flying. Greenough stuck to "Midnight's" steak, black back only two and a half seconds. The performance clinched the big show and the Canadian horse was given a great hand by the crowd in the grandstand. He was unridden to the last.

Mighty "Midnight" was once a docile, sturdy cow pony of the Alberta foothills. One day a tumbleweed blew down the big show and the Canadian horse was given a great hand by the crowd in the grandstand. He was unridden to the last.

The celebrated bucking bronc easily outstrips the meanest rodeo mount. He is more powerful, bigger, faster. He has the weight of a truck horse and the speed of a mustang. He goes mad when released from a chute but otherwise is kind and docile. "Born to buck—that animal," said an old-time cowboy recently. And that about sums it up.

The Friendly Border

Pat Campbell made the 500-mile trip from The Pas to Winnipeg with his dog outfit on the way to Chicago Fair and on reaching the border found that he would have to put up \$200 and \$2 for each dog entering the land of the free. Once again, says the Stratford Beacon-Herald, that is the same friendly international border about which orators speak at banquets.

The beauty of the house is order; the blessing of the house is contentment; the glory of the house is hospitality; the crown of the house is godliness.

Discussion of the wheat situation and its effect upon international relations marked a round-table conference of the Institute of Pacific Relations.

A Canadian delegate opened the discussion with an authoritative account of developments in Canadian wheat since 1927, the emergence of a serious glut, measures taken to cope with it, impact of foreign tariff upon Canada's export trade, and negotiations at Rome and elsewhere for coping with the situation.

Under present conditions the member said, the view is impracticable that the wheat growing industry of Western Canada may be described as bankrupt, and its plight is being aggravated by the chaotic condition of wheat acreage. He thought, however, there is considerable hope of advantage if the wheat grower in some international arrangement between the major wheat exporting countries whereby they would agree to establish between themselves a quota system for exports and to control deliveries. He believes such a scheme was feasible only if it would help to raise the price level, but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

If an export quota system were introduced it would be necessary to establish a wheat board which would keep export marketing within a single channel.

It was agreed if the process of industrialization continues in Japan she will be bound to seek food supplies in the cheapest market and will probably increase her import of wheat.

A delegate from the Dutch East Indies declared the tendency of Java to import wheat is increasing. Expansion of the wheat market available in China is problematical, it was indicated, as many Chinese do not consider wheat flour a superior article of food, and there is also an increase of local wheat production.

Cougars Menace Ranchers

Residents Of West Coast Of Vancouver Island Live Livestock

Residents of Port Alice, on the west coast of Vancouver Island, walk the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the town.

Having exterminated the deer and fur-bearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and hatters, practically all the dogs have fallen prey to them.

This information was brought by Rev. William Gravier, of Port Alice. "Unless drastic action is taken soon many of the ranchers will be forced to abandon their ranches," Mr. Gravier said.

Famous "Ball-Dog Ant"

Professor States Primitive Australian Insects Are Vicious Creatures

The only formidable "animals" in the Australian bush are poisonous snakes and the famous "bull dog ants," according to Dr. William Manton Wheeler, professor of entomology at Harvard University.

The "ponerine" or primitive ants of Australia sometimes reach more than an inch in length, are "angularly alert, wasp-like, large-eyed, long-jawed and fiercely stinging creatures. The larger species live in mound nests which may be from 1 to 5 feet in diameter and the population of a colony is from 150 to 200 individuals," said Dr. Wheeler.

Curfew For Parents

Windsor, Ontario, will again strictly enforce a curfew law which provides that all children under the age of sixteen shall be in their homes by 9 p.m. The next arrangement should be for one of the parents to be home to receive them for experiences show that it is queer gadgetry of parents who have gadgetry kids, and the Brampton Examiner.

Expeditions to the north and south poles are thrilling, but Lady Hubert Wilkins, wife of the famous Australian explorer, prefers the less adventurous joys of domestic life. She is now in New York while her husband is with the Ellsworth Antarctic Expedition. Lady Wilkins plans to accompany her husband on one more polar trip and then settle down to real home life.

RECOVERY SIGNS ARE NOTED IN BANK REVIEW

Toronto, Ont.—Signs of recovery in Canada are stressed in the current monthly reviews of both the Bank of Nova Scotia and the Bank of Montreal, made public here.

"After a period of almost four years in which the patient chronicler of events has been obliged to record conditions of ever-increasing gloom," stated the Bank of Nova Scotia, "it is with relief that he is at length able to present the reader with the fact of a definite increase in business activity."

Similarly, the Bank of Montreal letter states: "The past month has seen, on the whole, continuance of the favorable trend; consciousness since the spring; general business is now for the first time this year definitely above the level of the corresponding period of 1932 and this notwithstanding the decided check to the speculative upswing administered during July."

The Bank of Nova Scotia review considers the most significant feature the general rise in commodity prices, and the better equilibrium obtained as between the various groups of prices. "From a strictly Canadian viewpoint," the letter adds, "the better balance as between the prices of farm products and manufactured goods is especially important. It means, roughly, that what the farmer sells has a greater value in terms of what he buys than was the case six months ago. This relative improvement should do much to mitigate the unfavorable effects of short grain crops in western Canada."

Ocean Route Possibility

Colonel Lindbergh Has Faith In North Atlantic Air Route

Reykjavik, Iceland. — Colonel Charles A. Lindbergh believes it will be technically possible to establish a north Atlantic air route to Europe within two years.

With good planes and experienced pilots, he said, flights will be practicable under any weather conditions, but there is the question whether the route would be feasible financially at present.

Copenhagen, Denmark. — Colonel Charles A. Lindbergh and his wife took off from Røst Fjord, eastern Iceland. It was reported, but not confirmed, that they were bound for the Faroe Islands.

Reduced Fare For Students

Railways Cut Rate For Those Attending Canadian Universities

Montreal, Quebec.—C. P. Riddell, chairman of the Canadian Passenger Association, announced that the Canadian railways propose establishing reduced fare arrangements for teachers and students attending universities located in Canada. Sale dates of tickets will be from Sept. 1 to Oct. 15 inclusive each year, and the fare will be one and one-third of the regular one way first class fare.

The return limit will permit the purchaser to return home at the close of the term between May 1 and June 30 of the year following date of issue of ticket.

American Vessel Seized

Victoria, B.C.—Taken into custody by the fisheries patrol vessel "Ovench" in command of Capt. W. Redford, off the west coast of Vancouver Island while allegedly fishing in Canadian waters, the American halibut vessel "Curlew" of Seattle, and crew of five men, were brought here. The seizure was made in the vicinity of San Josef Bay.

No Help Needed

Calgary, Alta.—Due to a combination of poor crop prospects and an ever-increasing influx of jobless from British Columbia, demand for harvest hands in Calgary district at present is the poorest in the history of the provincial government employment bureau, it was stated by employment officials.

W. N. U. 2009

Ship Returns For Repairs

Bay Vessel Delayed Through Leak In Hull

Churchill, Man.—The leak in the hull of the S.S. Sieranta, Dryden line, which necessitated the return of the ship to port, was caused by galvanic action, according to W. H. Hartling, of Thomas Hartling and Sons, shipping agents, Montreal.

The "Sieranta," departed from Churchill, bound for Europe with 265,000 bushels of grain. When the vessel was 60 miles northeast of Churchill, water started to pour into the engine room.

A survey of the ship disclosed a hole about an inch and a half in diameter in the bottom of the steel hull under the engine room. Repairs will be made here. It is not known how long the ship will be in port.

"It was purely a matter of corrosion, the action of water and air on metal," said Mr. Hartling, agent for the owners. "It might have happened to any vessel anywhere." There was no ice in the region where the leak sprung.

Find Human Problem

Experts At Grain Conference Interrupted By Pathetic Incident

London, Eng.—Even world wheat conferences have their human episodes.

Technical experts from a dozen countries were gathered in earnest conference at Canada House discussing plans to permit their peoples to eat better bread.

As they talked, a weebegone man entered the building. He explained he wanted to get back to his wife and six children in Lethbridge, Alta. He had tramped Scotland and back, 900 miles, looking for a job that wasn't there.

A Canada House official took him in hand to see what could be done. And while the experts talked of granaries bursting with food, the man, a war veteran, wondered where he would get his next square meal.

Carriers Of Infection

Suspects Insects Are Spreading Sleeping Sickness Epidemic

St. Louis.—As the scope of a "sleeping sickness" epidemic in St. Louis widened to include victims in Oklahoma and Kansas, federal, state and city officials concentrated on a story of insects suspected as possible carriers of infection which has been fatal to 23 persons.

Science has been unable to learn much concerning the spread of encephalitis, and never has definitely established the mode of dissemination.

A total of 191 cases of sleeping sickness have been reported in the greater St. Louis area. Four deaths also have been reported at Wichita, Kas., Kansas City, Kas., and Warrensburg, Mo. Cases of the disease have been located at Maryville, Mo., and Muskogee, Okla.

Relief Problem

Five Municipalities In Manitoba In Need Of Assistance

Ottawa, Ont.—Hon. E. A. McPherson, provincial treasurer of Manitoba, conferred here with department of labor officials on a program of relief for southwest Manitoba. An area 30 miles square, embracing five municipalities, was hit this summer for the third year by drought and grasshoppers, leaving hundreds of farmers destitute.

It was proposed by Manitoba the Dominion administrator the dried-out area through the Saskatchewan relief commission, the federal treasury paying the whole cost. No definite reply was made by Hon. Wesley Gordon, minister of labor, but it has been understood here for some time the Dominion has intended closing down the Saskatchewan commission.

Salute For Premier Forbes

Chicago.—A welcoming salute of 19 guns was fired as Prime Minister Forbes of New Zealand arrived in Chicago to visit the World's Fair. He was accompanied by Mrs. Forbes and a party of eight, en route home from the London Economic Conference. They came by way of Canada and will remain two days.

PLANS BETTER WHEAT

Details of an extensive program to improve western wheat crops and thereby raise the premium which Canada obtains on world markets for her grain have been revealed by Dr. L. H. Newman (above) Dominion cerealist. He is at present doing research work in Western Canada.

Gandhi Is Released

Nationalist Leader Breaks Fast With Orange Juice

Poona, India.—M. K. Gandhi was unconditionally released from custody by the authorities and shortly thereafter he broke a week's fast with a cup of orange juice.

The Nationalist leader had served only a little more than three weeks of a one-year prison sentence for initiating a new civil disobedience campaign against the government.

Gandhi was very weak and it was believed there were minor complications, but two Poona doctors who examined him said there was no cause for alarm over his condition.

(Gandhi was released from jail under similar circumstances last May 8.)

Gandhi was eating at the home of Lady Vitall das Thackersey, widow of a Bombay merchant, at Parnakuti.

Bandits Captured

Thugs Rob Quebec Bank Of \$1,500 and Are Later Apprehended

Ste. Anne Des Plaines, Que.—A posse of citizens pursued and captured two bandits who an hour before had held up the manager of the Banque Provinciale here and robbed the bank of \$1,500 after forcing him at the point of a gun to remove his trousers.

The two men entered the bank while R. Lavole, the manager, was eating his lunch. They forced him to take off his trousers and open the safe. Removing \$1,500 in cash from the strong-box, they slugged Lavole over the head, tied him up in the basement and escaped. Pursuers surrounded the fleeing men. The \$1,500 was recovered it was reported.

New Nova Scotia Cabinet

Personnel May Not Be Announced For Some Time

Halifax, N.S.—Although Angus L. Macdonald is not expected to announce the personnel of his new Liberal cabinet for about three weeks, many suggestions are going the rounds as a result of the party's 22 to 8 victory over the Conservative forces in the Nova Scotia elections.

The 43-year-old leader, to become Canada's youngest provincial premier, is expected to take the portfolio of provincial secretary-treasurer.

Dr. J. L. McIsaac, of Antigonish, and Dr. M. E. McGarry, of Inverness, both members of the last legislature, are mentioned for minister of health, and J. A. Macdonald, of Kings, is said to have been promised the portfolio of agriculture.

A. S. MacMillan, who held the highways portfolio in the Armstrong government previous to 1925, is expected to resume that assignment, and Michael Dwyer, Liberal, Cape Breton Centre, seems to be the favorite for minister of public works and mines. The post of attorney-general probably will be filled either by John S. Smiley, K.C., of Cumberland, or J. H. MacQuarrie, Pictou.

Have Right-Of-Way

Pedestrians In Vancouver Favored By OM Law

Vancouver, B.C.—Ordinary pedestrian or "jay-walker" has right-of-way in Vancouver over motor traffic at marked and unmarked points, at controlled or uncontrolled intersections, according to a decision in police court.

Traffic bylaws were designed to give the pedestrians right-of-way at marked intersections except those controlled by signals or police, but an old law prevents prosecution of the pedestrian or "jay-walker" no matter where or when he chooses to cross.

Percy C. Mumbury, as the first motorist charged with failing to give right-of-way, was allowed to go with a warning after paying \$2.50 costs.

Conditions In Arctic Good

Major MacBrien States He Found Everything Quite Satisfactory

Ottawa, Ont.—Interviewed here on his return from Winnipeg after an 8,000-mile journey through the northwest which included visits to Great Bear Lake, the Copper-Mine, Mackenzie River, Yukon Territory and Alaska, Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police, said he found conditions in the Arctic and sub-Arctic entirely satisfactory.

While at Shingle Point General MacBrien saw the reindeer herd awaiting resumption of its trek to Kittigazuit.

COMMUNISM IS NEWEST TROUBLE FOR CUBANS

Havana.—Soldiers and police were ordered on guard in the streets and parks of the capital after authorities received a report demonstrations were planned by Communists, the newest trouble of the new Cuban government. The organization had been denied a permit to parade in observance of the execution of Nicola Sacco and Bartolomeo Vanzetti in the United States six years ago.

Speakers at Communist headquarters harangued an audience of negroes and whites, criticizing the provisional government of President Carlos Manuel De Cespedes, the A. B. C. Secret Society, "Yankee imperialism" and capitalism.

Referring to the overthrow 10 days ago of the Gerardo Machado government, the speakers said: "The victory is not the A. B. C's. The victory is Labor's and the Communist party's."

Reports from eastern Cuba said United States Ambassador Sumner Welles' activities in mediation of the Cuban political situation were criticized in speeches and that President Carlos Manuel De Cespedes was attacked. Strikes have continued in that region. Employers blamed Communist influence.

Typhoid Fever Epidemic

Toll Of Four Lives Taken In Nunnery In Montreal

Montreal, Que.—Both the milk and water supply at the Mother House of the Sisters of the Congregation of Notre Dame have been tested and found in order and as a result Dr. Seraphin Boucher, director of the Montreal health department announced he was convinced the typhoid fever which has already taken a toll of four lives within the convent and now threatens 26 others, was introduced from an exterior source.

A nun of the order died Wednesday at a Montreal hospital, but she had been ill for many weeks and her disease was not typhoid. Dr. Boucher states A check-up in the isolated convent infirmary revealed 26 and not 33 nuns have been definitely diagnosed as suffering from typhoid.

Meanwhile, utmost precautions are being taken to prevent spread of the infection within the convent walls, while special prayers are being said hourly in the convent chapel for the recovery of the ill and for the repose of the dead.

Fine Crop At Peace River

Edmonton, Alta.—One of the greatest crops in the Peace River area will be harvested this year according to Charles Frederick, editor of the Peace River Record. A long cold wet summer followed by most remarkable ripening weather, he said, would result in a record-breaking crop this season.

Recovers From Injuries

Sutton, Ont.—Captain Errol Boyd, trans-Atlantic aeroplane pilot, was fully recovered from slight injuries received when his veteran aeroplane "Columbia" crashed a mile west of here. The Columbia, twice conqueror of the North Atlantic, was damaged to the extent of a broken propeller and crumpled left wing.

Nothing To Say

London, Eng.—Prime Minister R. B. Bennett, chairman of the world wheat conference, was asked if he cared to offer any comment on the defeat of the Conservative Government in Nova Scotia. "No," was Mr. Bennett's brief reply.

Work Active At Flin Flon

Flin Flon, Man.—More than half a million tons of ore will be loosened in the open pit of the Flin Flon mine when 150 tons of dynamite are fired in September, according to Mine Superintendent M. A. Roche.

Movie Strike Called Off

Washington.—The United States labor board announced that the strike of moving picture sound men had been called off and all striking employees would return to work immediately.

Marshal Chang Hsueh-Liang, the Chinese War Lord, now visiting England with his sons, paid a visit to the Royal Air Force Station at Higdun Hill, Kent, to inspect aircraft and the establishment. He is shown here with folded arms, accompanied by his son (right), Wing Commander Wilcock (left), and Squadron Leader Crowe, watching an air display.

TALKATIVE CARS.

An amusing moment at Chicago's Century of Progress Exposition. First you come upon a stretch of smooth concrete highway on which a 1933 Oldsmobile rests. To the left, apparently disputing the intended passage of the modern car, sits a 1901 Oldsmobile, decked out in tiller and coffee grinder starting crank, not to pass up lightly numerous levers which once set off all sorts of terrifying noises. The old car is bogged down in a hopeless mud road which ends where the modern concrete road begins. The bulb horn on the old veteran honks gravely. It is immediately mocked by the Klaxon on the new car. At which point an amusing bit of dialog ensues in which the two cars argue their respective merits. Their hoods up, lights reveal the one-lung anatomy of the 1901 job, 8 red bulbs come on to count the cylinders of the new model, doors open, no-draft ventilation windows swing in and out, and roll up and down and engines stop and start until the comparison of old and new puts to flight the 30 year claims of the 1901 Oldsmobile horseless carriage. The bearded one then breaks down and admits that the new job has its virtues. It says to the current model: "But how did you get that way?" The answer is Research. The new car invites the old car to take a look around the Research displays and draw up a chair and learn something.

ARE YOU A MIND READER ?

An arm protruding from the side of the car ahead, according to the Montreal Star, can signify any one of the following things: The motorist is (1) knocking ashes off his cigarette; (2) going to turn to the left; (3) warning a small boy to shut up; (4) going to turn to the right; (5) pointing to the scenery; (6) going to back up; (7) feeling for rain; (8) telling the wife he is sure the front door is locked; (9) hailing a friend in a passing car; (10) going to stop.

The Stony Plain Const'nry U.F.A. Co-op. Ass'n, Ltd.

MR. FARMER,

Patronize your own farmer's organization, located in Stony Plain. We handle Binder Twine, "Apple Blossom" Flour, Cereals, Gasoline, all kinds of Oils and Greases, and other commodities. Remember, the larger the volume of purchases the larger the dividends. Help build up and boost your own organization.

Red Head Gasoline 31 cents, including tax.
Superior Gasoline, 26 cents, including tax.
Tractor Kerosene, 20 cents; no tax.
Lamp Kerosene, 23½ cents.

Motor and Tractor Oils range in price from 73c. to 87c., according to body.
FLOUR, \$2.75 per 100 pounds.

HOLLAND TWINE.

550, \$8.00 per 100 lbs.,
600, \$8.50 per 100 lbs.,
at various distributing points.

Spontaneous Combustion.

The Ontario Fire Marshals' records show that more barns are destroyed by fire originating from spontaneous combustion in hay than from any other cause except lightning in wooded farms.

Harvest weather conditions in 1932 were so dangerous that more barn fires than ever were expected. Instead there were 278 fewer barns burned in Ontario and a decrease of 17 p.c. in the number of fires known to be caused by spontaneous combustion.

Credit for this is given to the more general use of salt. The adequate use of salt is the most certain way of retarding and preventing spontaneous ignition fires.

VACATION TIME

go for a week, a month
or more, but go!
DELIGHTFUL RESORTS
FROM COAST to COAST

offer ample scope for your
favored recreations

EAST

MINAKI, MUSKOGA LAKES, 1000 ISLANDS—These are only a few of the resorts in Ontario which is a veritable land of Huron's Dwellers. In this section there is a resort to suit every taste and purse.

IN ANCIENT QUEBEC—The Vacation Land of Roussillon, where old-world customs and landmarks still abound. Many lovely resorts on the Lower St. Lawrence, in the heart of French-Canada.

THE PROVINCES BY THE SEA—Sea-side resorts and wonderful playgrounds abound in the Maritime Provinces. Fishing, sailing, forest rambles make each a joy.

WEST

CANADIAN ROCKIES—Visit the playground of Canada's wonderful West—a land of mystery and interest, splendid mountain ranges. Stop over at Jasper National Park—enjoy its superb hotel service—mountain-skiing and mountain climbing. Jasper Park Lodge open May 1st to September 30th.

TRIANGLE TOUR—Wandered from Jasper, take the scenic beauty of the Triangle Tour—along the scenic Shuswap to Prince Rupert—by boat, through the Shuswap Sea of the North Pacific to Vancouver—back through the sun-dappled mountain scenery of the Fraser and Thompson Rivers.

Take a boat trip to Alaska, visit the great Alaskan coast, the great Canadian National Railway. The Canadian National Railway offers a unique service. See Vancouver or Prince Rupert. Excellent service. Skagway for Lake Athabasca and the White Pass and Yukon Railway, the famous Klondike Trail of '06—a remembrance of thrills and a constant panorama of magnificent scenery.

TAKE ENO'S FRUIT SALT

OCCASIONAL WIFE
By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly admires him. He makes a date to see her that evening but is outwitted when she names an expensive night club. It is far beyond his means, but he resolves to go. Camilla goes to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist. Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park.

(Now Go On With the Story)

CHAPTER VI.

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. Some instinct told him that she needed him, yet he feared to remain. He glanced away toward the lacy green of new leaves toward the glistening white walls of the museum.

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lightened. "Then, that is why I haven't seen you, isn't it?"

"Yes, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

"Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," he laughed, "and it's not that I can't stand the pace, but the profs won't stand for it."

"I'm sorry. Did you get razzed about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?" "Wonderful! Did you?"

"Best in my life!" he declared.

"Then—you haven't avoided me because you were angry with me?" hesitantly.

"Of course not! And I haven't tried to avoid you," he prevaricated. "What made you think that?"

"Well, her eyes followed the toe of her slipper as it drew imaginary

lines in the grass, "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She looked up at him again with shining eyes. "Then it's all right," she said softly.

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently. "I should have phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me." She forfeited her last ounce of pride in a final desperate appeal.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house."

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming. Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts?

"Do you mean that you would like to come here—and talk with me—sometimes?"

"Any time. I often come here and sit alone in the evening. I never knew, though, that you were teaching over there, so near me."

"And I never knew you were so near, either. Will you be here, to night?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised. They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget—probably he never could—but he had

"It's about the longest hour I ever had," he confessed.

"Shall we walk a little? It's a marvelous night, isn't it?"

"Perfect. I like to walk around here at night. It all seems so different than in the daylight. Did you ever feel like that—as if a place that is very familiar to you in the day were a different place at night?"

"Yes, I've thought that, too. It's something like the difference between the way people appear to be and the way they are, isn't it?"

"Why," he exclaimed with surprise, "you funny little thing! I never knew you could be so serious."

"You see, I am like this park by day and by night—a dual personality. You know the man who sketches poorly in Professor Drake's class, but you don't know the man who comes to sit alone in the park and try to think things out."

"I like both of you."

His voice was deeply tender with the effort of suppressed emotion.

"But you don't know either of me," she objected, holding up her finger in a warning gesture.

"Perhaps better than you think."

"But you must not like me very much."

He felt repelled for his boldness. "I know. I shouldn't be so presuming. But I wonder why you came here tonight to meet me."

"Because I have to tell you something that I want you to know about me. I just can't go on letting you think I'm—"

"Are you sure that you should tell me anything about yourself?" he interrupted hastily. "I shouldn't want you to tell me something you might regret later."

"You are not interested. You don't want to listen?"

"Of course," he assured her earnestly. "That is just the trouble. I am too interested in you. I have been, ever since the first day I saw you in Drake's class. I'll always remember the minute you walked into that

room," he reminisced with pleasure. "You have been in my thoughts ever since."

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—for sympathy? Was it possible that, even yet, girls were compelled to marry men they did not love because someone else

room," he reminisced with pleasure. "You have been in my thoughts ever since."

Never Ran a Corner Grocery.

The Co-operative Commonwealth Federation has a brain trust. The recent manifesto of the National Council of the organisation was drawn up with the help of six university men, professors and Rhodes scholars, the most ardent and the most active of 30 or 40 degree laden Canadian intellectuals whose support has been welcomed by Mr Woodsworth, himself a man of academic frame of mind.

A list of the six chieftains of the C. C. F. Brain Trust is given by the writer in the Winnipeg Free Press.

At the head of the group is Frank H Underhill, professor of political science in Toronto. He is an Oxford man, who has for years been a crusading Socialist.

There is H F Cassidy of the department of social science of the University of Toronto; and there is Graham Spry, a Rhodes scholar, editor of the C. C. F. official organ in Ontario, the same paper for which Miss Agnes Macphail used the franking privileges of the Government to solicit subscriptions.

There is J F Parkinson, a young Scot, hailing from the London School of Economics, and in the Old Country a member of the Labor Party, who is now on the staff of the University of Toronto in economics.

There is Eugene Forsay, another Rhodes scholar, who is now a member of the Department of Political Economy at McGill.

Finally, there is J King Gordon, also a Rhodes scholar, a son of Ralph Connor, and occupant of the chair of Christian Ethics in the United College, Montreal.

The average age of the group is less than 32 years. Their enthusiasm is great. Their theoretical knowledge is perhaps adequate to the task and not one of them has ever been handicapped by ever having had to make any practical application of his theories, such, for instance, as making a success of a corner grocery store, running a factory to provide employment, or managing a farm without getting into trouble with the sheriff.

These are indeed great days for men with University medals and Oxford parchments!

Canadian National Railways

Low Fares to the Coast.

The C.N.Ry. announce that coach excursions will be in effect to Vancouver, Victoria and P. Rupert from Friday, Aug. 18, to Saturday, Sept. 2nd inclusive, with a 15-day limit, at 1c per mile each way, good in coaches, with slight extra charge in tourist cars. For further particulars, see your Local Agent.

Stony Plain and District

Monday next, Sept. 4th, is LABOR DAY.

Geo. Miller, a former pupil at S.P. High, left on Tuesday for Quesnel, B.C.

Mr Samuel Harmel, 'Edmonton, was in Stony on Saturday, visiting his sons' farm.

Mr Jac Mayer, of the Service Garage, was present Friday night at the annual garage men's moving picture, including an engineering film, shown at the Royal George Hotel.

Miss Phyllis Wood returned to Stony Plain on Monday with her mother, from a vacation spent at Jasper Park.

Stony Plain Public and High schools re-open Tuesday next, Sept. 5th.

Several S. P. H. pupils attended at the University on Monday, for re examination at the Supplemental.

Inga Councillors met on Saturday last at Secretary Best's office when, among the business transacted was consideration of the various road-work bills presented.

Three of the local grain elevators—the Searle, A. P. Federal—have had their power service switched from gasoline engines to the electric service provided by Calgary Power Co. The systems installed here provide a switch for the compressor and a switch for elevating.

Used text books for sale at The Sun Book Shop, Stony Plain.

BUTTER AND EGGS WANTED at The Royal Cafe.

Spruce Grove News

Mr Bryan Piercey left this week for Peace River, where he has secured the appointment as teacher. Previous to his departure he was given a farewell party by his young friends.

Mr Walter Brox returned to the Grove on Tuesday, from a motor trip to Saskatchewan with Mr John Ulmer.

A movement which has been afoot for some time, for the opening at Spruce Grove of a High School, is now taking shape. A meeting was held this week in the Grove school to arrange the matter with the department of education. Delegates were present from the school districts of Airm Lake, Michael, St John and Weidenheimer's.

The re-graveling of Jasper Highway from Meridian road to Winterburn is now completed to within a few miles of the latter point.

Mr J Nickel, a former resident, paid the Grove a visit on Monday. Jac expects to spend the winter down in California.

Prince's Ranch Model.

The model of the Prince of Wales ranch which attracted so much attention at Regina grain congress, has been moved to the National Exhibition at Toronto. The model is 120 ft. long, and is an almost perfect replica of the Prince's ranch at High River in every detail.

New Mail Schedule.

From the East—Sun. Tues and Fri. 10.37 p.m.

From the West—Tues. Thurs. & Sat. at 4.51 a.m.

Mail to West—Sun., Tues. and Fri. at 10.37 p.m.

Mail to East—Tues. Thurs. Sat. at 4.51 a.m.

Mail should be posted before 10 p.m. for despatch both East and West.

Reg. dispatched and received with every mail.

At The Sun Book Shop.

We are in receipt of the Catalog issued by the Alberta Department of Education, containing a list of Text Books to be used in the Public and High Schools of the Province. We are now taking orders for the Text Books you may need.

REPAIR WORK!

All Kinds of Carpentering, Plastering, Brick Work, and Repair Work on Buildings.

Mr. Val. Pailer,

Stony Plain.

On the Side.

There's been a rumor current in business circles for the past week that a change in the status of several of the local garages is contemplated—an entirely new firm taking on an old-established concern, and a new member entering one of the present companies. The prospect of a big revival in the automotive trade seems to have heartened several minded men so they're willing to take a chance.

When the schools get a going again there promises to be a big revival in basketball sport among the teams of Stony and nearby districts, particularly with the girls' teams. In view of the fact that there has been a decided paucity of sporting events heretofore this season, a revival of basketball will be welcome.

The immense profit made at the present time from the sale of text books and accessories has induced another Main street merchant to engage in the business; so the other morning he swept across the front door, cleaned last season's polka dots from the plate-glass window, moved back some horse collars, making room for the new line of goods. Passers-by may note a "Bickmore Gall Curve" rubbing shoulders with a "Disraeli" or "Lorna Doone".

The attention of the busy Sports promoters has been called to the fact that now the baseball season is practically over and the pitcher's mask and bats are about to be relegated to the cedar chest, and seen as how they're havin' snow storms in Montana and freeze'n' nights in Alberta, the time seems to be ripe for a preliminary discussion of the plans for the forthcoming hockey season, which promises to be as hectic as the baseball contests proved to be.

"Sparkie" was up to Lao Ste. Anne on Sunday and brought back a fish story. He met an old-timer who had been out fishing on the lake last spring and caught a strange looking fish; he brought it home, put it in a tub of water and forgot about it. During the hot weather the water in the tub dried up. The fish jumped out and followed the old timer around on land wherever he went. Two weeks the old timer took the fish out in a boat for a row. The fish fell in the water and was drowned. Sparkie has two more "corking" stories, but they're not about fish exactly. You'll have to get the yarns from him personally.

Listen to these seasonable remarks by The Edison Signal about "ambassadors of good sport":

The visit of the Edison ball team to Camrose may not have been as successful as we had hoped, but all is not lost. It has been demonstrated again, as it was demonstrated last year by Cadomin, that this district can produce ball teams that can be counted on to challenge the provincial title holders. These ball teams and hockey teams that leave this district at the end of their respective seasons to cross sticks and bats with outside teams are ambassadors of good sport and as such are mighty good advertising for the district.

A Correction.

The following correction appeared recently in the weekly paper of a Manitoba town: "Our paper carried the notice last week that Mr John Doe is a defective in the police force. This was a typographical error. Mr Doe is really a detective in the police force."
